

WHEN GRAVITY MEETS COLOUR

ZERO|15 | DUTZ | BY
EYEWEAR

titanium collection

Powerful and colourful, yet elegant and subtle: that's what Zero15 stands for. This totally new brand combines Dutz design with superior titanium. The result is a product that's light as a feather, has a perfect fit and gives its wearer an assertive look.

The Titans were the gigantic heroes in Greek mythology. As children of Uranus (heaven) and Gaia (earth), they were exceptionally strong. The same applies to the frames of Zero15. Although the titanium mix contributes to a weightless effect, the frame is exceptionally strong and corrosion-resistant.

The design of the Zero15 frames is minimalist, taut and refined. The line starts with 4 men's models and 4 women's models, both in 4 colours. The colour range is distinct; the two-colour effect provides an exciting contrast. Just like the entire Dutz collection, Zero15 is all about colour!

For the optician, Zero15 offers an innovative and distinguished brand with top-quality frames at affordable prices. The ideal eyewear for the customer who wants a brand that's timeless and trendy at the same time.
